## **Job Description for Great Gray Owl Survey Technician**

### **General Description**

A Survey Technician for great gray owl surveys is needed for work near Bridgeport, California. Work will consist of a total of 25 days of surveying for great gray owl and owl sign through rugged terrain. Work days to last between 8 and 10 hours and consist mainly of nocturnal survey work.

### **Primary Objectives**

- Follow survey protocol and locate Great Gray Owls
- Record and supply survey data to Vernadero for future reporting efforts

### **Specific Duties and Responsibilities**

- Conduct three 5-day survey events to take place separated by at least 7 days, occurring from 1 April to 15 May 2018.
- Conduct three 5-day survey events to take place separated by at least 7 days, occurring from 16 May to 15 July 2018.
- Record data via methodology provided by Vernadero. Meticulously track survey locations and visits to calling stations.
- Successfully navigate the Installation and to calling stations utilizing own four-wheel drive vehicle.

### **Qualifications**

- Minimum of a Bachelor's degree or equivalent in Wildlife Biology or similar subject.
- Preferred candidates will have two plus field seasons conducting Great Gray or Spotted Owl surveys.

### **Knowledge, Skills and Abilities**

- Broad avian and avian survey knowledge.
- Ability to hear and distinguish auditory calls of different nocturnal avian species.
- Demonstrated ability to hike in rugged terrain, at night, between 6-7 miles per day.
- Demonstrated ability to drive across rugged terrain utilizing four-wheel drive vehicle.
- Experience using GPS device for data collection.
- Excellent field survey data management.
